

Do not change or interfere with Indiana no call rules. If you have to have these rules, make the no call rules as strong as Indian rules. We have welcomed our quiet evenings without some idiot on the line trying to sell us something or apply for something that we do not need. We have a right, which is inalienable, to be left alone in our homes. This our property and the quiet times at our homes are also our property. Do not steal our property and right of quiet time for some person who will take time from us. We have the right to exclude that which we do not want in our homes and property. Weakening the no call rules is a theft of our property in being left alone. We do not bother others, the same should be extended to us.
